Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

PT New intraplastid targeting peptide, useful for delivering fused
PT heterologous sequences for preparing transgenic plants having altered
PT characteristics.
XX
PS Claim 1; SEQ ID NO 4; 63pp; French.
XX
CC This invention relates to a novel intraplastid targeting peptide. The
CC peptide may be used to transport selected proteins to plasts,
CC specifically chloroplasts, to create transgenic plants having altered
CC characteristics. These altered characteristics include, for example,
CC improved biosynthesis of lipids, starch, vitamins, hormones or proteins;
CC increased resistance to diseases and herbicides; more efficient light
CC capture; or overexpression of proteins involved in bioremediation. The
CC invention does not depend on the TOC or TIC membrane import pathways, so
CC does not compete with, or saturate, them, and importation into the
CC internal chloroplast membrane is achieved without cleavage of the
CC targeting peptide. The present sequence is that of a region the IE41
CC protein of *Arabidopsis thaliana* which is related to the invention.
